IV. Modification of the Administrative Instructions under the PCT.

I. *Fee increase effective January 1, 1982*

The PCT Assembly has established the following international fees to become effective on January 1, 1982.

International Designation Fee (for each State for which a national patent is sought, or for each group of States for which the same regional patent is sought	65.00

II. *Ratification by Belgium and listing of PCT Member Countries*

The Patent and Trademark Office has received notification from the World Intellectual Property Organization (WIPO) that Belgium deposited its ratification of the PCT on September 14, 1981. Therefore, according to PCT Article 63(2), Belgium may be designated in international applications filed on and after December 14, 1981. Belgium indicated in its ratification that it can only be designated by way of regional protection through the European Patent Convention. This provision is similar to the action taken by France. Therefore, any designation of Belgium in an international application will be considered to be a designation of Belgium for a Regional Patent.

*Members of African Intellectual Property Organization (OAPI) regional patent system. Only regional patent protection is available for OAPI Member States. A designation of any State is an indication that all OAPI States have been designated. Note: only one designation fee is due regardless of the number of OAPI member states designated.

**Members of European Patent Convention (EPC) regional patent system. Either national patents or European patents for member States are available through PCT, except for France and Belgium, for which only European patents are available if PCT is used. If regional protection is desired for one or more States, the indication "regional patent" must follow the designation of the State or States. Note: only one designation fee is due if the regional patent protection is sought for several States.

Section 203

Regional Patents

(a) If the applicant wishes to obtain a regional patent in respect of any designated State and the request form does not contain preprinted indications permitting the applicant to make the indication in the request referred to in Rule 4.1(b)(iv), the applicant shall make the said indication by inserting the words "regional patent," or their equivalent in the language of the international application, immediately after the indication of the said State or, where an indication has been made under Section 202, after that indication, provided that:

(i) where Article 4(1)(ii), third clause, applies, and not all the States party to the regional treaty have been designated, the international application shall be treated as if all those States had been designated and as if the designations of all such States contained the said words, whether the said designations contained an indication of the wish to obtain a regional patent or, according to Article 4(1)(ii), fourth clause, are to be treated as containing such indication;

(ii) where the national law of any designated State contains a provision as referred to in Article 45(2), the International Bureau shall, according to Article 4(1)(ii), fourth clause, treat the designation as if it contained the said words even where the applicant failed to indicate them.

(b) The applicant may, instead of the words "regional patent" referred to in paragraph (a), use other words to the same effect; such words may include a reference to a patent to be granted by the European Patent Office under the Convention of the Grant of European Patents done at Munich on October 5, 1973 ("European patent"), where the regional patent which the applicant wishes to obtain is a European patent.

(c) An indication, in respect of the designation of Liechtenstein or Switzerland, or both, of the wish to obtain a regional patent shall be taken as indicating a wish to obtain a European patent in respect of those States, whereas the absence of any indication of the wish to obtain a regional patent in respect of such a designation shall be taken as indicating a wish to obtain a patent granted by the Swiss Intellectual Property Office in respect of those States.

(c) Where, pursuant to paragraph (b), the receiving Office applies moneys in payment of the designation fees, it shall apply them to those fees successively in the order in which the designations appear in the international application up to and including the last designation, the fee for which is fully covered by the moneys.

(d)(i) When notifying the International Bureau pursuant to Rule 16*bis*.1(d) as to amounts charged to that Bureau pursuant to Rule 16*bis*.1(a) and/or Rule 16*bis*.1(b), the receiving Office shall, if it has received moneys from the applicant, inform that Bureau of the fees to which those moneys have been applied and the fees which it has charged to the International Bureau. The receiving Office shall, where applicable, indicate the designations (if any) for which the fees were paid by moneys (if any) so received and the designations for which the fees were charged to the International Bureau.

(ii) Where moneys have been applied by the receiving Office in accordance with an instruction received from the applicant as mentioned in paragraph (a), the receiving Office shall inform the International Bureau as to the effect of the said instruction, preferably by sending the International Bureau a copy of a written communication received from the applicant.
